

ONVIF Affiliate Product Listing

FAQ

Can an Affiliate have a logo listed on the member or conformant product pages?

Each membership can only list one logo on the member and conformant product pages. If a member company and its Affiliate would both like to be listed, the Affiliate company will need to fill out the Affiliate Product Listing Agreement. This will allow both logos and companies to be listed separately.

What is the Affiliate Product Listing Agreement and what is the cost?

The Affiliate Product Listing Agreement is a mechanism that allows companies the ability to list multiple brands. Affiliates have the same benefits as the parent member company. The annual fee for the Affiliate Product Listing Agreement is \$500.00/USD.

How does an Affiliate submit conformant products?

To have Affiliate products listed as a conformant product, the Affiliate must complete the conformance process for the products under their own name/brand. Details on the conformance process can be found in the [ONVIF Conformance Product Process](#) document.
