# ONVIF®

Standardizing IP Connectivity for Physical Security

Celebrating 10 years as a leading-industry forum driving interoperability for IP-based physical security products.

ONVIF Profiles for Simplified System Design

ONVIF profiles make it easy to recognize how ONVIF conformant devices and clients are compatible with one another.

(S) **Profile S** for streaming video

(C) **Profile C** for IP-based access control

(G) **Profile G** for edge storage and retrieval

(Q) **Profile Q** for quick installation

(A) **Profile A** for broader access control configuration

(T) **Profile T-Release Candidate** for advanced video streaming

Key Benefits for System Integrators & Specifiers

GREATER product choice
ASSURED interoperability
EASIER integration

ONVIF Conformant Products

To date, there are more than **9,000 Profile conformant products** which has led to millions of installed ONVIF conformant products in the market.

The ONVIF Conformant Product List is the authoritative source for determining whether or not a product is officially ONVIF compliant.

Further information about ONVIF conformant products, including the vendors and the conformant models, is available at onvif.org/conformant-products
